DESCRIPTION

Come change the way the world sees the Cloud!

You're a Software Development Engineer (SDE). Your time is limited and in demand. Rather than poring over hundreds of job descriptions, you'd rather just get to the part where you solve highly-complex problems, build environments to handle massive scale, develop thoughtful and elegant code, and partner with super smart teammates to deliver game-changing products and services.

These SDE openings are with Supply Chain and Infra Automation. These are full-stack software development positions, leaning towards back-end work. The Software Development Engineers are a significant and autonomous contributor.

BASIC QUALIFICATIONS

- 2+ years of non-internship professional software development experience

- Programming experience with at least one modern language such as Java, C++, or C# including object-oriented design

- 1+ years of experience contributing to the architecture and design (architecture, design patterns, reliability and scaling) of new and current systems.

PREFERRED QUALIFICATIONS

- 4+ years of experience developing objected-oriented software, with mastery of one or more relevant languages (Java, C#, C++, Ruby, etc.)

- Experience building complex software systems that have been successfully delivered to customers

- Knowledge of professional software engineering practices & best practices for the full software development life cycle, including coding standards, code reviews, source control management, build processes, testing, and operations

- Ability to take a project from scoping requirements through actual launch of the project

- Experience in communicating with users, other technical teams, and management to collect requirements, describe software product features, and technical designs.
